

Bipin Yadav

Full Stack Developer | React • TypeScript • Node.js

Mumbai, Maharashtra | +91 8928042884 | bipinyadav9769@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Full Stack Developer with 4+ years of production experience building scalable SaaS products across the stack with React, TypeScript, Node.js, and MySQL. Delivered measurable outcomes — 35% lift in lead conversions, 85% reduction in user input time, and 40% improvement in API response time. Based in Mumbai; open to on-site, hybrid, and remote roles.

TECHNICAL SKILLS

Web Development: HTML, CSS / SCSS, JavaScript (ES6+), Python

Frontend: React JS, TypeScript, Next JS, Redux, Context API, React Hooks, Material-UI, Ant Design, Chakra UI

Backend: Node JS, Express JS, REST APIs, MySQL, MongoDB

Tools: Git / GitHub, Postman, Webpack, VS Code, Linux Server Deployments

EXPERIENCE

Invizio Solutions | Frontend Engineer – SDE II

August 2022 – Present (4+ years) | Mumbai, Maharashtra

- Spearheaded development of a dynamic form builder using React, TypeScript, and Formik, contributing to a 35% increase in lead conversions and enhancing overall user experience.
- Engineered an auto-calculation module that cut down user input time by 85%, boosting form completion rates.
- Resolved API call stalls and integrated image compression for Bulk Image Upload Optimization, resulting in a 50% reduction in upload time.
- Architected a Config-Driven UI featuring Dynamic Form and Auto-Calculation functionality using TypeScript and React, enhancing UX and driving business growth by 25%.
- **Built and maintained backend services with Node.js / Express and MySQL**, optimizing complex SQL queries that improved API response time by 40% and helped retain 20% more customers on recurring modules.

Neog | Frontend Engineer

January 2022 – July 2022 (6 months)

- Resolved bugs and shipped new features across multiple web applications within a short-term engagement.

PROJECTS

Video Library ([Live Demo](#) | [GitHub Repo](#)) | Redux Toolkit • React JS • TypeScript

- A responsive web app similar to YouTube built with Redux Toolkit, React JS, and TypeScript, offering a seamless video streaming experience.
- Reduced state management complexity by 50% through the use of Redux Toolkit.
- Key features: Like, Watch Later, Create/Delete Playlist, and History — providing users with a personalized library.

Booknook — Full Stack E-Commerce Book Store ([Live Demo](#) | [GitHub Repo](#)) | React JS • TypeScript • Node.js/Express • MongoDB

- Engineered a scalable e-commerce platform enabling users to explore, filter, and purchase books across multiple categories.
- Added 5+ key features including payment gateway integration, user authentication, add-to-cart, and wishlist functionalities.
- Decreased development time by 20% through Context API for state management and modular component design.

Web Tour Website ([Live Demo](#) | [GitHub Repo](#)) | SCSS • React JS

- Developed interactive UI components and 15+ custom animations for enhanced user experience.
- Achieved a fully responsive design adapting to 5+ device screen sizes and resolutions.

Quiz App ([Live Demo](#) | [GitHub Repo](#)) | Context API • React JS

- A responsive web quiz app built with Context API and React JS, featuring 3 engaging quiz games with 10 questions each.
- Implemented score tracking, results summary, and multiple quiz categories for a personalized experience.

EDUCATION

Mumbai University | BSc Computer Science — Mumbai, Maharashtra

Navgurukul Foundation | Software Engineering — Dharamshala, Himachal Pradesh
